PROFILE

Senior Data Engineer with **5+ years of experience** **designing** and **implementing cloud-native data platforms** on **Azure**, **Databricks**, and **Snowflake**, **specializing** in the **migration of on-premise systems** and legacy datamarts **to scalable Lakehouse architectures.** Recently led the modernization of an enterprise data platform for one of the region's largest international airports.
Experienced in **delivering AI-enabled analytics solutions** and **machine learning initiatives** to **support business decision-making**. Strong expertise in Python, PySpark, and SQL for large-scale data processing, enrichment, and optimization. **Proficient in CI/CD automation** using **Azure DevOps** and **Terraform**, with **standardized deployment workflows** across enterprise environments.

WORK EXPERIENCE

Sr. CLOUD DATA ENGINEER, *BPT Software* Nov 2025 – Present | Lima, Peru

- **Architected** a **metadata-driven Lakehouse** on **Azure Databricks** unifying **batch** and **streaming** feeds from 4 sources (S/4HANA, AODB, SQL Server, SharePoint), cutting data processing latency by **65%** and dynamically orchestrating Medallion layers via centralized **control table**.
- **Engineered real-time PySpark** and **Auto Loader feature pipelines** serving **ML models** for **operational demand forecasting**, **anomaly detection**, and **passenger reconciliation** across **30M+ annual passenger records** to **eliminate revenue leaks.**
- Automated multi-environment **CI/CD** and **IaC** using **Terraform** and **Azure DevOps**, embedding **automated quality checks** on pull requests.

Sr. CLOUD DATA ENGINEER, *Teams PLUS* May 2024 – Oct 2025 | Florida, United States

- Architected a cloud data platform on **Snowflake**, **Databricks**, and **PySpark**, enforcing strict **Pydantic data validation** contracts across **15TB+ daily telecom feeds**, to prevent ingest schema anomalies and **power scalable operational analytics** and **production AI pipelines.**
- **Built streaming pipelines** with **Spark Structured Streaming** and **ADF**, cutting operational data latency **to sub-minute**, and **deployed an NL-to-SQL AI agent** that **resolved over 40% of ad-hoc database queries** for **management** in **natural language**.
- Enforced comprehensive **data governance** and **security** in Azure and Snowflake, **including RBAC**, **dynamic data masking**, **encryption** at rest and in transit, **audit and monitoring policie**s, enabling **secure AI-assisted access**, faster decisions, and **deeper business knowledge.**

Sr. DATA ENGINEER, *INDRA* Jan 2023 – Apr 2024 | Lima, Peru

- **Led a legacy-to-Lakehouse migration** on **Azure Databricks** for a major bank, **unlocking $670K in annual savings** by auditing batch mesh schedules, eliminating redundant Mainframe compute, and **refactoring ingestion** into **PySpark CDC pipelines.**
- **Engineered end-to-end ML data pipelines** in **Databricks powering Anti-Money Laundering models**, automating feature extraction and **real-time transaction anomaly detection** across **core banking streams** to **ensure regulatory compliance.**

DATA ENGINEER, *Handytec* Jan 2021 – Dec 2022 | Quito, Ecuador

- Implemented a **real-time data ingestion architecture** from **Oracle to Azure Datalake and Databricks** using **LogMiner, ADF, and CDC**, optimizing performance with **PySpark transformations** and **Delta Lake** to ensure **ACID compliance** and reduce processing time by **40%**.
- Developed **interactive financial dashboards** in **Snowflake and BigQuery**, applying **data storytelling, analytics, and dynamic filtering** to enhance business visibility and enable **real-time, data-driven decisions**.

EDUCATION

CLOUD DATA ENGINEER, *Microsoft and Databricks Certified* 2024 – 2025

Microsoft Certified: Azure Data Engineer Associate (DP-203) | **Azure Data Fundamentals (DP-900)** Certified expertise in **Azure data management**, demonstrating advanced capabilities in **SQL Database, Blob Storage, and Data Lake configurations**, focused on delivering **secure, scalable, and high-performance data solutions** for complex business needs.
Databricks Certified Data Engineer Associate: Proven proficiency in **building, optimizing, and orchestrating data pipelines**, applying best practices in **PySpark performance tuning**, **data reliability**, and **workflow automation** to streamline enterprise data processing.

SOFTWARE ENGINEER, *4Geeks Academy* 2023 | Florida, Estados Unidos

- Integrated an **AI-powered chatbot** with the **OpenAI API** to automate recipe generation and enhance user engagement through natural language interactions.
- Performed **data analysis to identify user trends and behavior patterns**, improving the presentation and ranking of recipes through continuous monitoring and iterative optimization.

MECHANICAL ENGINEER, *Universidad de Ingeniería y Tecnología, UTEC* 2018 – 2022 | Lima, Perú

Smart Drip Irrigation Prototype:

- Engineered an **IoT-enabled drip irrigation system** leveraging **embedded sensors, control automation, and edge computing**, achieving a **30% reduction in water consumption** through data-driven optimization and precision monitoring.
- Integrated the system with **Azure IoT Hub** to enable **real-time telemetry ingestion, data streaming, and analytics** on environmental and soil metrics, applying **Python-based automation and predictive algorithms** for proactive alerts and intelligent irrigation control.

SKILLS

Architecture Design in Cloud | Analysis and Management of Lakehouses in Databricks | Automation through APIs and Web Scraping | Agile Methodologies SCRUM and KANBAN | Embedded IoT Systems | Parallel Computing MPI and OpenMP | Linux and Scripting | Machine Learning and Big Data | Data Security | Data Visualization with Power BI | Streaming Architectures | Databricks Lakehouse | Versioning

COMPUTER PROGRAMS

Python | PySpark | Java | Scala | SQL Server | MongoDB | Apache Cassandra | Hadoop | Spark | Kafka | Databricks | Snowflake | Airflow | dbt | Azure | AWS | Docker | Kubernetes | GitHub | Jenkins | Power BI | Terraform | Flask | Node.js | TensorFlow | Denodo | SAP | REST APIs | CI/CD
